Independently published.

Every sudoku has been checked by computer for a single solution, and every word-search answer has been checked against its grid.

Contents

80 Word Search Puzzles ..... pages 4–83
Solutions ..... pages 84–103

How to Play

Find every word from the list hidden in the grid. Words run forwards, backwards, up, down and diagonally, always in a straight line.

Where an entry in the list is two or more words, it is hidden in the grid without the spaces.

Letters may be shared by more than one word. Tick each word off the list as you find it.

Solutions are at the back of the book, with each word circled.
